105 PTS		OVERLORD						
Unit	M	T	SV	W	LD	OC		
Overlord	5"	5	2+	6	6+	1		
Abilities	Description							
Leader	This model can be attached to the following units: <ul style="list-style-type: none"> ■ IMMORTALS ■ LYCHGUARD ■ NECRON WARRIORS 							
My Will Be Done	Once per battle round, one unit from your army with this ability can be targeted with a Stratagem for OCP, even if you have already targeted a different unit with that Stratagem this phase.							
Implacable Resilience	Each time an attack is allocated to this model, subtract 1 from that attack's Damage characteristic.							
Invulnerable Save	This model has a 4+ invulnerable save.							
Resurrection orb	Once per battle, while the bearer is leading a unit, at the end of any phase, it can resurrect that unit if it is on the battlefield. When you do, that unit's Reanimation Protocols are activated reanimating D6 wounds instead of D3 when doing so. You cannot resurrect more than one unit per turn.							
Osteoclave Fulcrum	NECRONS model only. Models in the bearer's unit have the Deep Strike ability.

Abilities	Description							
Bound Creation	While this unit is in the same unit as a CRYPTOTEK model, that CRYPTOTEK model has the Feel No Pain 4+ ability.							
Systematic Vigour	Each time a CRYPTOTHRALL model in this unit is destroyed by a melee attack, if that model has not fought this phase, roll one D6: on a 2+, do not remove it from play. The destroyed model can fight after the attacking model's unit has finished making its attacks, and it is then removed from play.							
Cryptek Retinue	At the start of the Declare Battle Formations step, this unit can join one other unit from your army that is being led by a CRYPTOTEK model (a unit cannot have more than one CRYPTOTHRALLS unit joined to it). If it does, until the end of the battle, every model in this unit counts as being part of that Bodyguard unit, and that Bodyguard unit's Starting Strength is increased accordingly.

Selection Rules

Assault

Weapons with [ASSAULT] in their profile are known as Assault weapons. If a unit that Advanced this turn contains any models equipped with Assault weapons, it is still eligible to shoot in this turn's Shooting phase. When such a unit is selected to shoot, you can only resolve attacks using Assault weapons its models are equipped with.

Blast

Weapons with [BLAST] in their profile are known as Blast weapons, and they make a random number of attacks. Each time you determine how many attacks are made with a Blast weapon, add 1 to the result for every five models that were in the target unit when you selected it as the target (rounding down). Blast weapons can never be used to make attacks against a unit that is within Engagement Range of one or more units from the attacking model's army (including its own unit).

Deadly Demise D3

Some models have 'Deadly Demise x' listed in their abilities. When such a model is destroyed, roll one D6 before removing it from play (if such a model is a TRANSPORT, roll before any embarked models disembark). On a 6, each unit within 6" of that model suffers a number of mortal wounds denoted by 'x' (if this is a random number, roll separately for each unit within 6").

Deadly Demise D6

Some models have 'Deadly Demise x' listed in their abilities. When such a model is destroyed, roll one D6 before removing it from play (if such a model is a TRANSPORT, roll before any embarked models disembark). On a 6, each unit within 6" of that model suffers a number of mortal wounds denoted by 'x' (if this is a random number, roll separately for each unit within 6").

Deep Strike

During the Declare Battle Formations step, if every model in a unit has this ability, you can set it up in Reserves instead of setting it up on the battlefield. If you do, in the Reinforcements step of one of your Movement phases you can set up this unit anywhere on the battlefield that is more than 9" horizontally away from all enemy models.

Devastating Wounds

Weapons with [DEVASTATING WOUNDS] in their profile are known as Devastating Wounds weapons. Each time an attack is made with such a weapon, if that attack scores a Critical Wound, no saving throw of any kind can be made against that attack (including invulnerable saving throws). Such attacks are only allocated to models after all other attacks made by the attacking unit have been allocated and resolved

Feel No Pain 4+

Some models have 'Feel No Pain x+' listed in their abilities. Each time a model with this ability suffers damage and so would lose a wound (including wounds lost due to mortal wounds), roll one D6: if the result is greater than or equal to the number denoted by 'x' that wound is ignored and is not lost. If a model has more than one Feel No Pain ability, you can only use one of those abilities each time that model suffers damage and so would lose a wound.

Feel No Pain 5+

Some models have 'Feel No Pain x+' listed in their abilities. Each time a model with this ability suffers damage and so would lose a wound (including wounds lost due to mortal wounds), roll one D6: if the result is greater than or equal to the number denoted by 'x' that wound is ignored and is not lost. If a model has more than one Feel No Pain ability, you can only use one of those abilities each time that model suffers damage and so would lose a wound.

Heavy

Weapons with [HEAVY] in their profile are known as Heavy weapons. Each time an attack is made with such a weapon, if the attacking model's unit Remained Stationary this turn, add 1 to that attack's Hit roll.

Hyperphasing

At the end of your opponent's turn, you can select a number of NECRONS units from your army (excluding units that are within Engagement Range of one or more enemy units). The maximum number of units you can select depends on the battle size, as follows:

Incursion - Up to 2 units

Strike Force - Up to 3 units

Onslaught - Up to 4 units

Once you have made your selection, remove those units from the battlefield and place them into Strategic Reserves.

Ignores Cover

Weapons with [IGNORES COVER] in their profile are known as Ignores Cover weapons. Each time an attack is made with such a weapon, the target cannot have the Benefit of Cover against that attack.

Infiltrators

During deployment, if every model in a unit has this ability, then when you set it up, it can be set up anywhere on the battlefield that is more than 9" horizontally away from the enemy deployment zone and all enemy models.

Leader

While a Bodyguard unit contains a Leader, it is known as an Attached unit and, with the exception of rules that are triggered when units are destroyed (pg 12), it is treated as a single unit for all rules purposes. Each time an attack targets an Attached unit, until the attacking unit has resolved all of its attacks, you must use the Toughness characteristic of the Bodyguard models in that unit, even if a Leader in that unit has a different Toughness characteristic. Each time an attack successfully wounds an Attached unit, that attack cannot be allocated to a Character model in that unit, even if that Character model has lost one or more wounds or has already had attacks allocated to it this phase. As soon as the last Bodyguard model in an Attached unit has been destroyed, any attacks made against that unit that have yet to be allocated can then be allocated to Character models in that unit.

Lethal Hits

Weapons with [LETHAL HITS] in their profile are known as Lethal Hits weapons. Each time an attack is made with such a weapon, a Critical Hit automatically wounds the target.

Lone Operative

Unless part of an Attached unit, this unit can only be selected as the target of a ranged attack if the attacking model is within 12".

Pistol

Weapons with [PISTOL] in their profile are known as Pistols. If a unit contains any models equipped with Pistols, that unit is eligible to shoot in its controlling player's Shooting phase even while it is within Engagement Range of one or more enemy units. When such a unit is selected to shoot, it can only resolve attacks using its Pistols and can only target one of the enemy units it is within Engagement Range of. In such circumstances, a Pistol can target an enemy unit even if other friendly units are within Engagement Range of the same enemy unit.

If a model is equipped with one or more Pistols, unless it is a MONSTER or VEHICLE model, it can either shoot with its Pistols or with all of its other ranged weapons. Declare whether such a model will shoot with its Pistols or its other ranged weapons before selecting targets.

Precision

Weapons with [PRECISION] in their profile are known as Precision weapons. Each time an attack made with such a weapon successfully wounds an Attached unit, if a Character model in that unit is visible to the attacking model, the attacking model's player can choose to have that attack allocated to that Character model instead of following the normal attack sequence.

Rapid Fire

Weapons with [RAPID FIRE X] in their profile are known as Rapid Fire weapons. Each time such a weapon targets a unit within half that weapon's range, the Attacks characteristic of that weapon is increased by the amount denoted by 'x'.

Reanimation Protocols

If your Army Faction is NECRONS, at the end of your Command phase, each unit from your army with this ability activates its Reanimation Protocols and reanimates D3 wounds. Each time such a unit reanimates a wound:

- If that unit contains one or more models with fewer than their starting number of wounds remaining, select one of those models; that model regains one lost wound.
- If all models in that unit have their starting number of wounds, but that unit is not at its Starting Strength, one destroyed model is returned to that unit with one wound remaining.

Once such a unit is at its Starting Strength and all of its models have their starting number of wounds, nothing further happens.

Scouts 9"

Some units have 'Scouts x' listed in their abilities. If every model in a unit has this ability, then at the start of the first battle round, before the first turn begins, it can make a Normal move of up to x" as if it were your Movement phase – as can any DEDICATED TRANSPORT model such a unit starts the battle embarked within (provided only models with this ability are embarked within that DEDICATED TRANSPORT model). A unit that moves using this ability must end that move more than 9" horizontally away from all enemy models. If both players have units that can do this, the player who is taking the first turn moves their units first.

Stealth

If every model in a unit has this ability, then each time a ranged attack is made against it, subtract 1 from that attack's Hit roll.

Sustained Hits

Weapons with [SUSTAINED HITS X] in their profile are known as Sustained Hits weapons. Each time an attack is made with such a weapon, if a Critical Hit is rolled, that attack scores a number of additional hits on the target as denoted by 'x'

Torrent

Weapons with [TORRENT] in their profile are known as Torrent weapons. Each time an attack is made with such a weapon, that attack automatically hits the target.

Twin-linked

Weapons with [TWIN-LINKED] in their profile are known as Twin-linked weapons. Each time an attack is made with such a weapon, you can re-roll that attack's Wound roll.
