Dedicated Transport [115pts]

Immolator [115pts]

Selections: Armoured tracks, Heavy Bolter, Hunter-Killer Missile, Immolation Flamers
Categories: DEDICATED TRANSPORT, VEHICLE, SMOKE, TRANSPORT, IMPERIUM, IMMOLATOR, FACTION: ADEPTA SORORITAS, FACTION: ACTS OF FAITH
Rules: *Acts of Faith, Deadly Demise, One Shot*
Abilities: *Deadly Demise, Fire Support, Invulnerable Save, Transport*, **Melee Weapons:** *Armoured tracks*, **Ranged Weapons:** *Heavy Bolter, Hunter-killer missile, Immolation Flamers*, **Unit:** *Immolator*

Abilities	Description
Deadly Demise	D3
Fire Support	In your Shooting phase, after this model has shot, select one enemy unit hit by one or more of those attacks. Until the end of the phase, each time a friendly model that disembarked from this TRANSPORT this turn makes an attack that targets that enemy unit, you can re-roll the Wound roll.
Invulnerable Save	This model has an invulnerable save of 6+
Transport	<p>This model has a transport capacity of 6 ADEPTA SORORITAS INFANTRY models. It cannot transport JUMP PACK models or the Triumph of Saint Katherine.</p> <p>At the start of the Declare Battle Formations step, you can select one BATTLE SISTERS SQUAD, DOMINION SQUAD or SISTERS NOVIATIAE SQUAD from your army. If you do, that unit is split into two units, each containing as equal a number of models as possible (when splitting a unit in this way, make a note of which models form each of the two new units). One of these units must start the battle embarked within this Transport; the other can start the battle embarked within another Transport, or it can be deployed as a separate unit.</p>

Selection Rules

Acts of Faith: If your Army Faction is ADEPTA SORORITAS, each unit from your army with this ability can perform one Act of Faith per phase. This is done using Miracle dice.

GAINING MIRACLE DICE

If your Army Faction is ADEPTA SORORITAS, you gain 1 Miracle dice:

- At the start of each turn.
- Each time an ADEPTA SORORITAS unit from your army is destroyed.

Each time you gain a Miracle dice, roll one D6. The number you roll is the value of that Miracle dice. This value cannot be changed or re-rolled, unless a rule specifically states otherwise. Keep your Miracle dice to one side – this is your Miracle dice

pool.

PERFORMING AN ACT OF FAITH

Before making a dice roll for a model or unit from your army with the Acts of Faith ability, if you have one or more dice in your Miracle dice pool, that unit can perform an Act of Faith. If it does, select one of the dice from your Miracle dice pool to substitute that dice roll (if a roll involves more than one dice, e.g. a Charge roll or Battle-shock test, only a single dice can be substituted). The dice that is being substituted is not rolled; instead the value of the selected Miracle dice is used as if it had been rolled (this counts as an unmodified dice roll of that value for all rules purposes). Each Miracle dice can only be selected for substitution once. Once all Miracle dice substitutions have been made, remove the chosen Miracle dice from your Miracle dice pool, and roll all remaining, unsubstituted dice that are a part of the dice roll. You can use Miracle dice when a unit performs an Act of Faith for any of the following types of dice roll:

- Advance roll
- Battle-shock test
- Charge roll
- Damage roll
- Hit roll
- Saving throw
- Wound roll

Assault: Weapons with [ASSAULT] in their profile are known as Assault weapons. If a unit that Advanced this turn contains any models equipped with Assault weapons, it is still eligible to shoot in this turn's Shooting phase. When such a unit is selected to shoot, you can only resolve attacks using Assault weapons its models are equipped with.

Blast: Weapons with [BLAST] in their profile are known as Blast weapons, and they make a random number of attacks. Each time you determine how many attacks are made with a Blast weapon, add 1 to the result for every five models that were in the target unit when you selected it as the target (rounding down). Blast weapons can never be used to make attacks against a unit that is within Engagement Range of one or more units from the attacking model's army (including its own unit).

Bondsman Abilities: Some QUESTORIS models have a Bondsman ability, tagged with the word 'Bondsman'. In your Command phase, one or more models from your army with a Bondsman ability can use that ability. For each one that does, select one friendly ARMIGER model within 12" of that model (you cannot select an ARMIGER model that is already being affected by a Bondsman ability). Until the start of your next Command phase, the ARMIGER model you selected is affected by that Bondsman ability.

Deadly Demise: Some models have 'Deadly Demise x' listed in their abilities. When such a model is destroyed, roll one D6 before removing it from play (if such a model is a TRANSPORT, roll before any embarked models disembark). On a 6, each unit within 6" of that model suffers a number of mortal wounds denoted by 'x' (if this is a random number, roll separately for each unit within 6").

Deadly Demise 1: Some models have 'Deadly Demise x' listed in their abilities. When such a model is destroyed, roll one D6 before removing it from play (if such a model is a TRANSPORT, roll before any embarked models disembark). On a 6, each unit within 6" of that model suffers a number of mortal wounds denoted by 'x' (if this is a random number, roll separately for each unit within 6").

Deadly Demise D6: Some models have 'Deadly Demise x' listed in their abilities. When such a model is destroyed, roll one D6 before removing it from play (if such a model is a TRANSPORT, roll before any embarked models disembark). On a 6, each unit within 6" of that model suffers a number of mortal wounds denoted by 'x' (if this is a random number, roll separately for each unit within 6").

Deep Strike: During the Declare Battle Formations step, if every model in a unit has this ability, you can set it up in Reserves instead of setting it up on the battlefield. If you do, in the Reinforcements step of one of your Movement phases you can set up this unit anywhere on the battlefield that is more than 9" horizontally away from all enemy models.

Devastating Wounds: Weapons with [DEVASTATING WOUNDS] in their profile are known as Devastating Wounds weapons. Each time an attack is made with such a weapon, if that attack scores a Critical Wound, no saving throw of any kind can be made against that attack (including invulnerable saving throws). Such attacks are only allocated to models after all other attacks made by the attacking unit have been allocated and resolved

Feel No Pain 5+: Some models have 'Feel No Pain x+' listed in their abilities. Each time a model with this ability suffers damage and so would lose a wound (including wounds lost due to mortal wounds), roll one D6: if the result is greater than or equal to the number denoted by 'x': that wound is ignored and is not lost. If a model has more than one Feel No Pain ability, you can only use one of those abilities each time that model suffers damage and so would lose a wound.

Hazardous: Weapons with [HAZARDOUS] in their profile are known as Hazardous weapons. Each time a unit is selected to shoot or fight, if one or more models attack with Hazardous weapons, then after that unit has resolved all of its attacks, you must take one Hazardous test for each Hazardous weapon that was just used by rolling one D6. For each roll of 1, that test is failed and one model in that unit equipped with a Hazardous weapon is destroyed (selected by the controlling player), unless

that model is a Character, Monster or Vehicle, in which case it suffers 3 mortal wounds instead. Note that if you selected a Character model in an Attached unit, the mortal wounds suffered must be allocated to that model first, even if there is another model in that unit that has lost one or more wounds or has had attacks allocated to it this phase.

Heavy: Weapons with [HEAVY] in their profile are known as Heavy weapons. Each time an attack is made with such a weapon, if the attacking model's unit Remained Stationary this turn, add 1 to that attack's Hit roll.

Ignores Cover: Weapons with [IGNORES COVER] in their profile are known as Ignores Cover weapons. Each time an attack is made with such a weapon, the target cannot have the Benefit of Cover against that attack.

Indirect Fire: Weapons with [INDIRECT FIRE] in their profile are known as Indirect Fire weapons, and attacks can be made with them even if the target is not visible to the attacking model. These attacks can destroy enemy models in a target unit even though none may have been visible to the attacking unit when you selected that target.

If no models in a target unit are visible to the attacking unit when you select that target, then each time a model in the attacking unit makes an attack against that target using an Indirect Fire weapon, subtract 1 from that attack's Hit roll and the target has the Benefit of Cover against that attack.

Leader: While a Bodyguard unit contains a Leader, it is known as an Attached unit and, with the exception of rules that are triggered when units are destroyed (pg 12), it is treated as a single unit for all rules purposes. Each time an attack targets an Attached unit, until the attacking unit has resolved all of its attacks, you must use the Toughness characteristic of the Bodyguard models in that unit, even if a Leader in that unit has a different Toughness characteristic. Each time an attack successfully wounds an Attached unit, that attack cannot be allocated to a Character model in that unit, even if that Character model has lost one or more wounds or has already had attacks allocated to it this phase. As soon as the last Bodyguard model in an Attached unit has been destroyed, any attacks made against that unit that have yet to be allocated can then be allocated to Character models in that unit.

Melta: Weapons with [MELTA X] in their profile are known as Melta weapons. Each time an attack made with such a weapon targets a unit within half that weapon's range, that attack's Damage characteristic is increased by the amount denoted by 'x'.

One Shot: The bearer can only shoot with this weapon once per battle.

Pistol: Weapons with [PISTOL] in their profile are known as Pistols. If a unit contains any models equipped with Pistols, that unit is eligible to shoot in its controlling player's Shooting phase even while it is within Engagement Range of one or more enemy units. When such a unit is selected to shoot, it can only resolve attacks using its Pistols and can only target one of the enemy units it is within Engagement Range of. In such circumstances, a Pistol can target an enemy unit even if other friendly units are within Engagement Range of the same enemy unit.

If a model is equipped with one or more Pistols, unless it is a MONSTER or VEHICLE model, it can either shoot with its Pistols or with all of its other ranged weapons. Declare whether such a model will shoot with its Pistols or its other ranged weapons before selecting targets.

Rapid Fire: Weapons with [RAPID FIRE X] in their profile are known as Rapid Fire weapons. Each time such a weapon targets a unit within half that weapon's range, the Attacks characteristic of that weapon is increased by the amount denoted by 'x'.

Super-Heavy Walker: Each time a model with this ability makes a Normal, Advance or Fall Back move, it can move over models (excluding TITANIC models) and terrain features that are 4" or less in height as if they were not there.

Supreme Commander: If this model is in your army, it must be your WARLORD.

Sustained Hits: Weapons with [SUSTAINED HITS X] in their profile are known as Sustained Hits weapons. Each time an attack is made with such a weapon, if a Critical Hit is rolled, that attack scores a number of additional hits on the target as denoted by 'x'.

The Blood of Martyrs: Each time an ADEPTA SORORITAS model from your army makes an attack, add 1 to the Hit roll if that model's unit is below its Starting Strength, and add 1 to the Wound roll, as well, if that model's unit is Below Half-strength. For the purposes of this ability, if a unit has a Starting Strength of 1, it is considered to be below its Starting Strength while it has lost one or more wounds.

Torrent: Weapons with [TORRENT] in their profile are known as Torrent weapons. Each time an attack is made with such a weapon, that attack automatically hits the target.

Twin-linked: Weapons with [TWIN-LINKED] in their profile are known as Twin-linked weapons. Each time an attack is made with such a weapon, you can re-roll that attack's Wound roll.
